

The Federal Communications Commission

Dear The Federal Communications Commission,

I believe the flat fee proposal you are considering is unfair. People who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers.

Does the FCC serve the citizens of the U.S. or is it simply another corporate machine serving a small gang of extremely wealthy manipulators? Corporations don't need this break! Have the guts to stop this undemocratic and un-American trend in our nation!

I urge you to reject the flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Melanie Hogue
